DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-16 in the reply filed on 31 May 2005 is acknowledged. Claims 17-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the embodiment of claim 16 where the manufacturer's joint includes a tear strip and perforations must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Andrews.

5. Claims 1-4, 10 and 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Weber.

6. Claims 1, 6-8 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Beloate et al (fig. 2 emb). Beloate et al discloses a package including a second flap 10, 19 with perforations 27, tear strip 10 and thumb notch 30 as claimed.

7. Claims 1-12 and 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rumberger. Note is especially made of col. 6, line 38 through col. 7, line 40.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3727

9. Claims 1, 2, 13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Mahon or Kiedaisch, each in view of either Andrews or Weber. Each of Mahon and Kiedaisch discloses a manufacturer's joint (46 or 47; 28, respectively) incorporating a tear strip. Neither Mahon nor Kiedaisch evidences perforations located on the seam, i.e. between the first and second flaps forming the seam capable of allowing adhesive to seep into the material. Each of Andrews and Weber teaches that it is known to make a manufacturer's joint with perforations (15; 68, respectively) to provide a stronger bond and evidence tampering if it occurs. It would have been obvious to provide perforations within the bonded manufacturer's joint in either Mahon or Kiedaisch as taught by either Andrews or Weber to prevent tampering and resealing of the joint prior to opening the tear strip.
